

Kraft Paper

Kraft paper is produced in the kraft process, which is stronger than that made by other pulping processes. It is a porous paper with high elasticity and high tear resistance, designed for packaging products with high demands for strength and durability. Kraft paper is much stronger, due to its reduced lignin content and high sulfur ratio, especially unbleached kraft paper. Compared with other paper, kraft paper has better pressing elasticity and high flatness, which can significantly improve the pressing quality and increase the yield of products.

Advantages:

- ◆ Exceptional Printable Surface
- ◆ Stable Thickness & Evenness
- ◆ Extreme Durability
- ◆ High Flexibility
- ◆ High Strength & Stiffness
- ◆ High Tear Resistance

Applications:

Kraft paper bags, paper cups, paper trays, paper boxes, paper lids, sleeve, and other food packagings. Beside, Kraft paper can be corrugated to make much stronger packaging.

Ivory Board

Ivory board, also called white cardboard, has high requirements for whiteness. Ivory board is made of pure wood pulp, the paper is flat and free from harmful substances. It has small stretchability, toughness, and is not easy to break when folded. It suits both food and non-food packaging. In the production of these two processes are the same, but the food grade relative to the production workshop environment requirements, requirements for paper composition higher.

Advantages:

- ◆ Excellent Surface
- ◆ High Whiteness
- ◆ Beautiful Printing Effect
- ◆ High Color Constancy
- ◆ High Smoothness
- ◆ Neat Appearance
- ◆ Ageing-resistant
- ◆ Rigid Strong and Durable Paper

Applications:

Paper shopping bag, name card, post card, paper lids, paper trays, paper plates, paper boxes (cake, tart, chocolate, pharmaceutical, confectionery, frozen food etc); body and care, cosmetics, pharmaceuticals, textiles, tools, small electronics appliances, household appliances etc).

JOIN US IN OUR MISSION

Join us in our mission to create a greener, more sustainable future. Together, let's make a difference by choosing eco-friendly paper solutions that protect the planet for generations to come.

TOTAL PAPER PRODUCTS SOLUTION

ABOUT US

Welcome to **Foralis**, a leading manufacturer and provider of premium biodegradable paper rolls, paper cups, and eco-friendly paper products. At Foralis, we are committed to revolutionizing the paper industry by offering sustainable alternatives that prioritize environmental responsibility without compromising on quality or performance.

OUR MISSION

Our mission at Foralis is to lead the global transition towards sustainability by providing innovative, biodegradable paper solutions that reduce environmental impact and promote a healthier planet. We strive to empower businesses and individuals alike to make eco-conscious choices in their daily lives, fostering a culture of environmental stewardship and collective responsibility.

WHAT SETS US APART

At Foralis, we distinguish ourselves through:

1. Quality Excellence:

We uphold the highest standards of quality in our manufacturing processes, ensuring that every paper roll, cup, and product meets stringent quality benchmarks. Our commitment to excellence ensures that our customers receive products of unmatched quality and reliability.

2. Environmental Responsibility:

Sustainability lies at the heart of everything we do. Our paper cups and products are crafted from responsibly sourced materials and are designed to break down naturally, leaving behind minimal environmental footprint. By choosing Foralis, customers can make a positive impact on the planet.

3. Innovation and Customization:

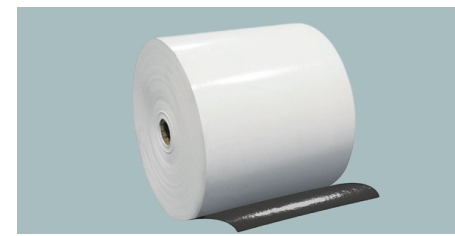

We continuously innovate and explore new technologies and materials to enhance the sustainability and functionality of our products. Our team works closely with clients to provide customized solutions tailored to their specific needs, ensuring maximum satisfaction and value.

4. Customer-Centric Approach:

We prioritize customer satisfaction above all else. Our dedicated team is committed to providing exceptional service and support at every stage of the customer journey. Whether you have questions, require assistance, or need guidance on eco-friendly solutions, we're here to help.

OUR PRODUCT RANGE

At Foralis, we offer a diverse range of eco-friendly paper solutions, including:

PE Coating Paper Board

PE coating paper board is an eco-friendly high-quality board specially designed for ovenable paper containers, which is with high requirements for formability. PE coating paper board is food-safe, ecological as a renewable material, and works exceptionally well in ovenable container forming. With high heat-resistant but thin PE coating, paper containers made of PE can be used for heating or warming up prepared and semi-prepared foods. The white, black or transparent PE coating also provides protection against humidity, grease, and oxygen.

Advantages:

- ◆ Excellent Surface
- ◆ Plastic Reduction
- ◆ Beautiful Printing Effect
- ◆ Wide Temperature Range
- ◆ High Smoothness
- ◆ High heat resistance
- ◆ Ageing-resistant
- ◆ Rigid Strong and Durable Paper

Applications:

From freezer to oven, from -20°C to 220°C, great material for baking, ready-meal and other ovenable packaging. Besides, it can be used in press trays, ovenable paper bowls and boxes, etc.

Paper Fan

Here are the solutions for the paper fan of different product categories, from paper cup, paper bowl, paper bucket, paper box, paper tray and paper lid etc. Combined with our additional service (coating, laminating, printing, varnish, die-cutting), we can offer one-site service for you, for different requests from material to technique, which will greatly save your time and money.

Material Options:

Cupstock paper/Kraft paper/Ivory paper board with (or without) PE/PLA/PBS coating

Printing Options:

Flexo/Offset printing with (or without) varnish

Feature and Advantage:

Quality: strong stiffness and smooth appearance

Customization: applied in different shapes or sizes as per customers' request

Convenience: applied to the forming process directly, easy and quick

Package: wrapped with film and packed in standard pallet or as per customized request

Application:

Suitable for drinking cups(coffee, coke, tea, milky tea etc.), noodle bowls, soup containers, food buckets, ice cream cups and other cylindrical food packaging.

Cupstock Paper

Our cupstock paper is food grade, eco-friendly paper, suitable for both hot and cold food and beverages. It is sustainable and recyclable. Our high quality cupstock paper has the ability to liquid proof and grease proof, because it's laminated with PE,PLA,PBS or Water Base coating solutions. Cupstock paper with high stiffness, good flatness, loose thickness appropriate at the same time also will control the surface roughness, in order to meet the requirements of the paper cup surface fine.

Advantages:

- ◆ Excellent Surface
- ◆ High Brightness without Fluorescer
- ◆ Excellent Printability
- ◆ High Stiffness
- ◆ Easy to Process & Form
- ◆ Durable Liquid Resistant
- ◆ Impeccable Sealing
- ◆ High Safety & Hygiene

Application:

Suitable for hot/cold beverages, noodle boxes, noodle bowls, soup containers, food buckets, ice cream cups, ice cream tubs, etc. and other food packages.
